PERSON PROFILE

Highly motivated and skilled Junior Web Developer with hands-on experience in front-end and back-end development. Proficient in HTML, CSS, and JavaScript, with a strong eye for design and attention to detail. Achieved remarkable results in building responsive websites and collaborating effectively in team environments, ensuring seamless user experiences. Eager to contribute innovative solutions and further develop expertise in cutting-edge technologies.

EMPLOYMENT HISTORY

Frontend Developer

Responsibilities:

- Developed visual appearance and functionality of websites using HTML, CSS, and JavaScript.
- Ensured compliance with UI/UX standards to create optimal user experiences.
- Collaborated with design and development teams to achieve project goals.

Backend Developer

Responsibilities:

- Developed business logic and backend functionality using programming languages such as Python and Ruby.
- Built and managed databases to support web applications.
- Provided API and integration with third-party services.

EDUCATION

Informatics, Universitas Syiah Kuala, Banda Aceh

August 2021

Ungraduated
